

Weather Station Project

- ▶ Submitted by: Manish Kumar Yadav
 - ▶ M.Sc. IT - Part II, Semester III
 - ▶ Shailendra Degree College
 - ▶ Guide: Asst. Prof. Hemchandra Kumbhar
- 

Introduction

- ▶ • This project aims to build a Weather Station using IoT.
 - ▶ • It captures temperature and humidity data using sensors.
 - ▶ • The data is visualized on a cloud platform.
- 
- A series of four parallel white diagonal lines in the bottom right corner of the slide, slanting upwards from left to right.

Description of System

- ▶ • Uses Arduino UNO as the microcontroller.
 - ▶ • DHT11 sensor captures humidity and temperature & LED Display.
 - ▶ • Data is sent to the cloud for remote access.
- 
- A series of four parallel white diagonal lines extending from the bottom right corner towards the center of the slide.

Limitations of Present System

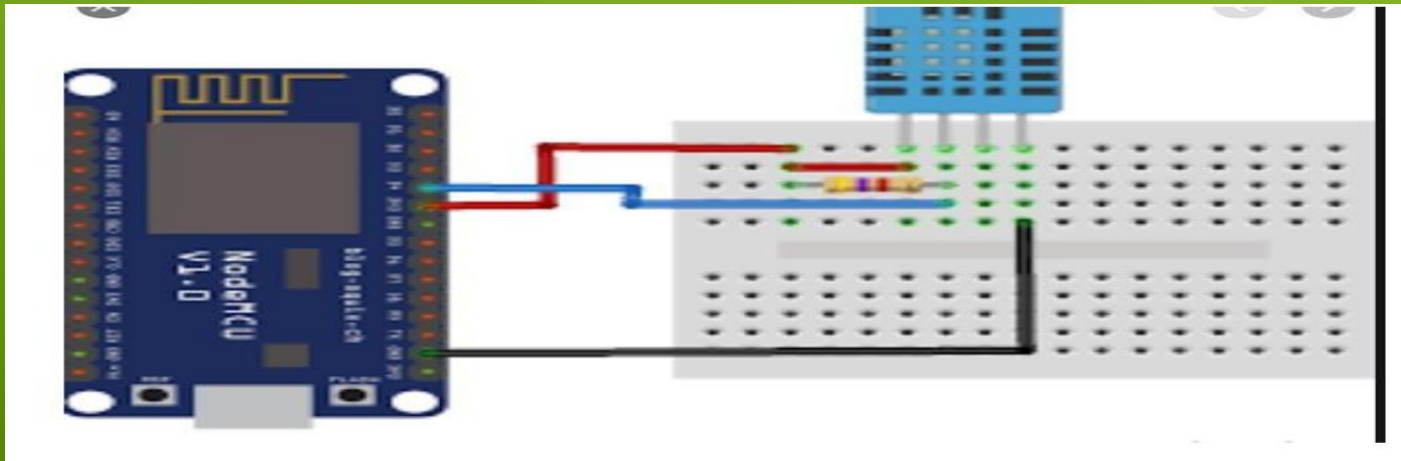

- ▶ • Slower processing time.
 - ▶ • Requires additional devices for operation.
 - ▶ • Complex programming for microcontrollers.
- 

Proposed System & Advantages

- ▶ • Low-cost and energy-efficient solution.
 - ▶ • Uses NodeMCU and cloud-based storage.
 - ▶ • Provides real-time weather monitoring.
- 
- A series of four parallel white diagonal lines in the bottom right corner of the slide, slanting upwards from left to right.

System Design & Implementation

- ▶ • Hardware: NodeMCU, DHT11, Jumper Cables, Breadboard.
- ▶ • Software: Arduino IDE, Thingspeak cloud platform.
- ▶ • Circuit designed for accurate data capture.

Results & Data Visualization

- ▶ • Test cases confirm system functionality.
 - ▶ • Data is exported in CSV format for analysis.
 - ▶ • Graphical visualization in Excel or Python.
- 
- A series of four parallel white diagonal lines in the bottom right corner of the slide, slanting upwards from left to right.

Future Enhancements & Conclusion

- ▶ • Addition of sensors for air quality and wind speed.
 - ▶ • Integration with mobile apps for real-time alerts.
 - ▶ • Useful for farmers and environmental monitoring.
- 
- A series of four parallel white diagonal lines extending from the bottom right corner towards the center of the slide.
